

BUS CLEANING DURING COVID-19

While we all need to do our best to prevent the spread of the virus that causes COVID-19, it is important to emphasize that we all must follow guidelines on proper application of selected products, including dilution requirements and time that disinfectants need to remain on surfaces in order to be effective.

ESSENTIAL INFORMATION

- Ventilation of the bus while cleaning and disinfecting is key. Open doors and windows where possible
- Wear proper PPE as specified by the product safety data sheet while cleaning and disinfecting. Wash hands after use.
- If new products are introduced, workers should be given training on these new chemicals and their proper use.
- Remind all passengers to use hand sanitizer as they load

CLEANING PROTOCOLS

Drivers will clean and disinfect their buses after their morning AND afternoon runs. Cleaning protocols include:

- High touch surfaces including buttons, rails, steering controls, door handles, shift knobs and dashboard controls.
- Seat surfaces and seat backs.
- Window areas
- Floors will be swept and sanitized daily
- Remove trash, clean spills

Drivers will indicate (check or circle) they have met the cleaning protocol on a twice daily basis in the calendar attached and make it available for audit by the Transportation Manager or designate.
