Students come first

Wetaskiwin Regional Public Schools is committed to inspiring students to become the best they can be – both in the classroom and in life. Our teachers, administrators, staff and trustees are focused on helping students explore their talents, discover their interests and reach their full academic and personal potential.

We offer our students a well-rounded educational experience that supports academic excellence, and equips them with the skills and knowledge they need for the future. We teach students to explore, analyze and understand the world around them so that they are prepared for post-secondary and career success.

Our schools also create opportunities for students to explore their artistic and athletic talents, through a combination of complementary courses and extracurricular activities. Many of our schools showcase student talent through performances, concerts and presentations that are open to the community. Our schools also offer dynamic athletic options and intramural programs that allow students to hone their athletic abilities while learning to work as part of a team.

We know that today’s students will become the citizens of tomorrow. That’s why we teach students to look to the world around them and see how they can serve and enrich their communities. Whether through participating in events that support charitable organizations or volunteering in the community, we work to instill a sense of responsibility and compassion for others that will stay with them into adulthood.

Something for everyone

Our schools offer a full range of programming, including core academic courses and a number of enrichment options. Many of our schools also offer specialized programs of choice that meet the specific needs and interests of families, and include such offerings as:

- **French Immersion** – at both the elementary and junior high level
- **Year-round schooling** – instead of an extended summer break, students break for shorter periods throughout the calendar year
- **Early Intervention** – specialized programs for children with developmental delays. Family support is an integral component.
- **Home Education** – provides families with curriculum and instruction support to students receiving their education at home.
- **High school work experience and Career and Technology Studies** – opportunities for students to gain valuable work experience and job skills while still in high school

These programs are offered at select schools throughout the division, and are open to all WRPS families.

Many of our schools are located in smaller communities. These schools offer a full range of core and complementary programming, with some also offering enriched programs in subjects such as science, music or art. For information about what each school offers, please contact the school directly.

Partners in learning

Parents and community members are the public in public education. With increasingly limited education dollars and the increased expectations of post-secondary institutes and employers, school divisions, parents and community members must work together to help students succeed.

We believe that parents are a child’s first and most important teacher, and look to our parents for guidance on how we can help students realize their potential. We encourage parents to become involved with their child’s school and to consider sitting on parent council or volunteering in the classroom. In addition, our Council of School Councils (COSC) brings together school council members from all schools to share their ideas at the divisional level.

WRPS is accountable to our communities, and is always looking for ways to improve our efficiencies and our results. As part of this, we work with community members and business leaders to gather feedback and ideas. Through meetings and consultations, we also develop programs and initiatives that prepare students to become the valued employees and responsible citizens of tomorrow.

This collaborative approach to learning guides everything we do as a division and is key to our ongoing success.

“Our schools offer a full range of programming.”
